Developing a Project

What Is a Task?

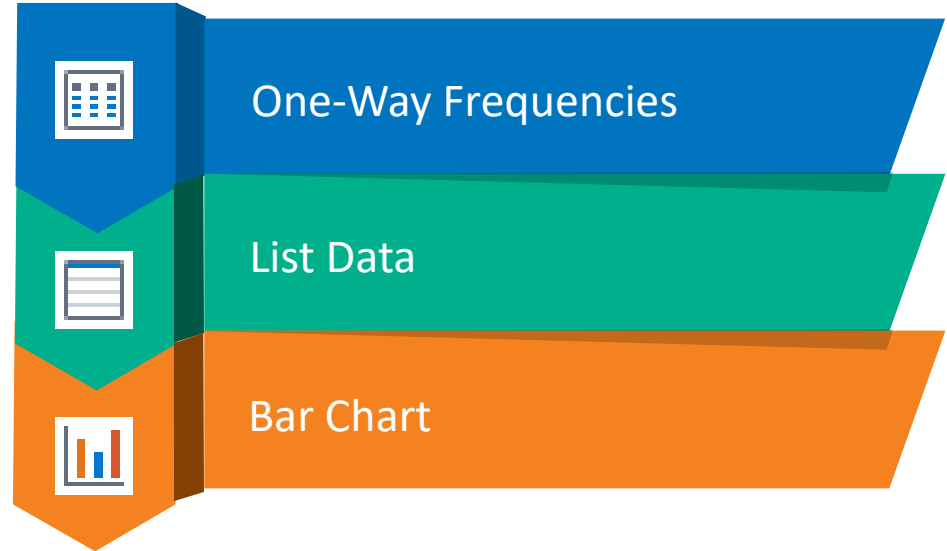

Discussion

Use the Tasks pane in the navigation area, and expand each category. Which tasks might be helpful in your work?

Exploring Data with Tasks

Working with Tasks

**Select the Data
Source**

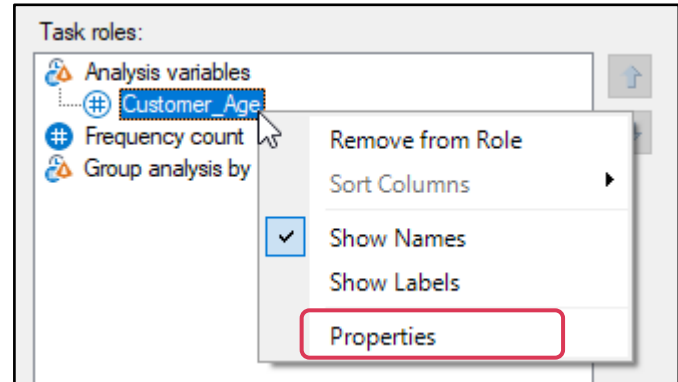

**Set Column Roles
and Properties**

**Specify Task
Options**

**Provide Titles and
Footnotes**

3.01 Activity

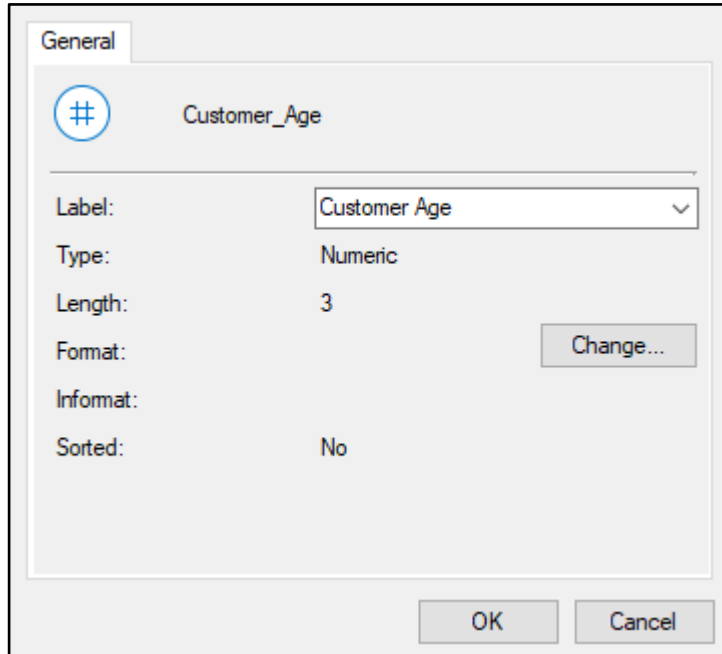

1. Close all open items and start a new project.
2. Select **File** ⇒ **Open** and navigate to the course data location.
3. Select **orion_profit** and click **Open**.
4. In the Tasks pane, expand **Describe** and double-click **One-Way Frequencies**.
5. Drag **Customer_Age** to the Analysis variables role.
6. Right-click **Customer_Age** and select **Properties**.

Which column attributes can you modify?

3.01 Activity – Correct Answer

Which column attributes can you modify?

The screenshot shows the 'General' tab of a SAS dialog box for the variable 'Customer_Age'. The dialog box has a title bar with a '#' icon and the text 'Customer_Age'. Below the title bar, there are several attributes listed on the left and their values on the right:

- Label: Customer Age (with a dropdown arrow)
- Type: Numeric
- Length: 3
- Format: (with a 'Change...' button next to it)
- Informat:
- Sorted: No

At the bottom of the dialog box, there are 'OK' and 'Cancel' buttons.

3.6 Creating a Graph

Task Output Formats

3.03 Multiple Answer Question

Which output formats will you use in your work? (Select all that apply.)

- a. HTML
- b. SAS Report
- c. Listing
- d. Excel
- e. PDF
- f. PowerPoint
- g. RTF

Summary of Output Formats

	HTML	SAS Report	Listing	Excel	PDF	PowerPoint	RTF
View within Enterprise Guide	Yes	Yes	Yes	No	No	No	No
Software required for viewing outside of Enterprise Guide	Any browser	Other SAS applications	Any text viewer	Microsoft Excel	Acrobat Reader	Microsoft PowerPoint	Any word processor
Use point-and-click techniques to combine results into a single document	No	Yes	No	No	No	No	No

Discussion

What are some advantages of each format?

Modifying Output Format

This demonstration illustrates modifying the properties of a task to produce additional result formats, including PDF.

Questions?

3.04 Activity

1. Double-click any One-Way Frequencies task in the project.
On the Results tab, select **Modify Task**.
2. Select **Properties** ⇒ **Edit** ⇒ **Results**.
3. Select **Customize result formats, styles, and behavior** and select **SAS Report** as a report format in addition to HTML.
4. In the drop-down list for the SAS Report style, select **Meadow**.
5. Click **OK** ⇒ **Run**.
6. View the SAS Report and HTML results.

Do the result styles match for each type of output?

3.04 Activity – Correct Answer

Do the result styles match for each type of output?

<

Employee Count by Department

HTML - Dept Freq Report

SAS Report - Dept Freq Report

Department		
Department	Frequency	Percent
Accounts	17	1.62
Accounts Management	9	0.86
Administration	121	11.53
Concession Management	11	1.05
Engineering	31	2.96

The SAS Report results have a different style.
